Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 18-19** are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art (AAPA) fig. 1 in view of AAPA fig. 2.

AAPA fig 1 discloses a fully enclosed type motor with outer fans, comprising:

- first bearing (4) provided at one end of stator core via a bracket;
- second bearing (5) provided at the other end of the stator core via housing member;
- rotor shaft (6) to which the rotor core attached, by the first the rotor shaft being rotatably supported and second bearings;
- and ventilation fan fixed the rotor shaft and having a fan with blade on the rotor core side.

AAPA fig. 1 substantially discloses the claimed invention, except for the fan also having blade formed on the bracket side.

However, AAPA fig. 2 teaches a fully enclosed motor with a fan having blade formed on the bracket side for the purpose of circulating cooling air through the housing, particularly between the stator core and the outer bracket of the housing. This would enhance the cooling air ventilation thereof.

Art Unit: 2834

Thus, it would have been obvious to one skilled in the art at the time the invention was made to modify AAPA fig. 1 fan that has blade on the rotor core side by configuring the fan with another blade on the bracket side of the housing, as taught by AAPA fig. 2. Doing so would provide a fan with inner blade and outer blade that would enable the cooling air circulating improvement for the motor.

Allowable Subject Matter

Claims 1-17 and 20 are allowed.
